American Academy of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN™

Pathways Awareness Foundation

Pathways Awareness Foundation is a national non-profit organization dedicated to raising community awareness of the benefits of early detection and early therapy for children with physical movement concerns. The organization recently produced a brochure entitled "Assure the Best for your Baby's Physical Development," which was endorsed by the American Academy of Pediatrics.

The Pathways brochure, designed to educate parents, includes a growth and development chart highlighting typical speech, play and physical developmental milestones from 3 to 15 months of age. This unique tool allows parents to track their child's development and encourages early treatment and therapy for delays.

Pathways distributes more than 250,000 brochures annually.

To order copies of the brochure or to get more information about Pathways, call the "parent-answered" toll-free number at 800/955-2445 (CHILD), by e-mail at friends@pathwaysawareness.org, or visit the Web site at www.pathwaysawareness.org.
