Which is more active?  
 the mobile  your baby

Sometimes a parent just knows. If you think there may be a delay in your child's development, don't silently worry. Early detection and early therapy can make all the difference. For more information, call 800-955-CHILD or visit [pathwaysawareness.org](http://pathwaysawareness.org).

The only thing worse than getting the answer is not asking the question.
